

## How do I modify student visibility?

You can hide students from the Grade Center view to reduce the number of rows in your Grade Center. The hidden students are not removed from the Grade Center. They still have access to the gradebook in their course sites.

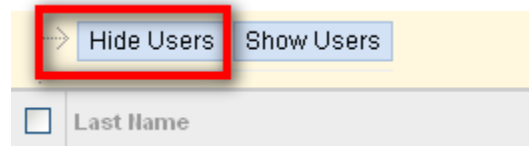

To hide or show a student,

1. From the Grade Center page, select **Manage > Student Visibility**,

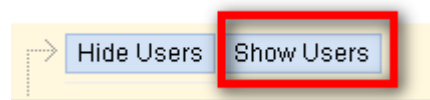

2. A new page appears.

- a. Select the desired students and click **Hide Users** to hide them from your Grade Center.

- b. If you want to show students who have been hidden, select them and click **Show Users**.

3. Don't forget to click **Submit** to have the changes take effect.
