

## How do I set course availability and duration?

To customize course settings, you will be able to customize the settings by individual items or by the whole menu using the drop-down menus available on the right of each button in Edit Mode On.

1. Click the Edit Mode Off button  as you must be in Edit Mode On  to be able to have the drop down menus available on the buttons and menu.
2. Click on **Customization** link under the heading **Control Panel**.

3. Select **Properties** link when the screen below appears.

4. On the **Properties** module, you can change the Classification, Availability, Duration, and Language Pack.

### 5. Course Availability

To make the course available for students, select **Yes** then **Submit**. If Course Availability is set to “No,” students will not be able see or access the course. It’s better to make your course available after you finished developing the course.

### 6. Course Duration

Course duration controls how long your course is available to students. This should be set to **Continuous** unless you have a specific date when you want students to no longer access the course.

 **Properties**

Properties control the functional settings of the Course. Use this page to change the Name and Description of the Course, the availability of the Course, how the Course appears in the Course Catalog, and the default language to use. [More Help](#)

\* Indicates a required field.

**1. Classification**

Subject Area

Discipline

**2. Set Availability**

Make this course available to users?

Make Course Available  Yes  No

**3. Set Course Duration**

Duration  Continuous  Select Dates

Start Date

End Date

Days from the Date of Enrollment

**4. Select Language Pack**

Select the Language Pack that will be used for buttons, titles, and other text supplied by the system. Enforcing the Language Pack will override individual users' language choices.
