Generated Data Elements: Data Elements in **bold** are RADSS Generated Data Elements. An '*' after the format indicates the variable is generated at run-time. The trailing asterisk(*) character(s) of the variable name, as in FAAD**** and DGCUR*, denotes an array generated data element.

Missing Data Elements: Data Elements in **red** are currently missing from the conversion from the PeopleSoft Student Administration system. Many of these data elements will be restored with an updated database design in a future version of RADSS.

Dual Functioning: The Data Elements at Student Term (Level 4) can function as either Student Term (Level 4) or Student Master (Level 5) in the VARIables or SElect statements, depending upon whether one of the STUTERM variables are coded. (See the Dual Function Data Elements Section in the RADSS Manual for more information.)

Generated Data Elements: Data Elements in **bold** are RADSS Generated Data Elements. An '*' after the format indicates the variable is generated at run-time. The trailing asterisk(*) character(s) of the variable name, as in FAAD**** and DGCUR*, denotes an array generated data element.

Missing Data Elements: Data Elements in **red** are currently missing from the conversion from the PeopleSoft Student Administration system. Many of these data elements will be restored with an updated database design in a future version of RADSS.
